Preamble

The following regulations have been adopted by the UEFA Executive Committee on the basis of Article 50(1) of the *UEFA Statutes*.

Doping is a constant preoccupation of international sports organisations and national governments.

The fundamental aims of UEFA's doping controls are:

- to uphold and preserve the ethics of sport;
- to safeguard the physical health and mental integrity of football players;
- to ensure that all competitors have an equal chance.

Doping controls were introduced to ensure that the results of the matches in UEFA's competitions are a fair reflection of the strength of the contenders.

I General provisions

Article 1

Doping

- 1.01 Doping is defined as the occurrence of one or more of the anti-doping rule violations set forth in paragraph 2.01 below.

Article 2

Anti-doping rule violations

- 2.01 The following constitute anti-doping rule violations:

- a) The presence of a prohibited substance or its metabolites or markers in a player's sample.
- It is each player's personal duty to ensure that no prohibited substance enters his body. Players are responsible for any prohibited substance or its metabolites or markers found to be present in their samples. Accordingly, it is not necessary that intent, fault, negligence or knowing use on the player's part be demonstrated in order to establish an anti-doping rule violation.
 - Sufficient proof of an anti-doping rule violation is established by either of the following: presence of a prohibited substance or its metabolites or markers in the player's A sample where the player waives analysis of the B sample and the B sample is not analysed; or, where the player's B sample is analysed and the analysis of the player's B sample confirms the presence of the prohibited substance or its metabolites or markers found in the player's A sample.

- Excepting those substances for which a quantitative threshold is specifically identified in the Prohibited List, the presence of any quantity of a prohibited substance or its metabolites or markers in a player's sample constitutes an anti-doping rule violation.
- As an exception to subparagraph 2.01a, the Prohibited List may establish special criteria for the evaluation of prohibited substances that can also be produced endogenously.
- b) Use or attempted use by a player of a prohibited substance or prohibited method.
 - It is each player's personal duty to ensure that no prohibited substance enters his body. Accordingly, it is not necessary that intent, fault, negligence or knowing use on the player's part be demonstrated in order to establish an anti-doping rule violation for use of a prohibited substance or prohibited method.
 - The success or failure of the use or attempted use of a prohibited substance or prohibited method is not material. It is sufficient that the prohibited substance or prohibited method was used or attempted to be used for an anti-doping violation to be committed.
- c) Refusing, or failing without compelling justification, to submit to sample collection after notification as authorised in these regulations or otherwise evading sample collection.
- d) Violation of applicable requirements regarding player or team availability for out-of-competition testing, including failure to file required whereabouts information and missed tests as set out in Appendix E. Any combination of three missed tests and/or filing failure violations within a 18-month period shall constitute an anti-doping rule violation.
- e) Tampering or attempted tampering with any part of a doping control.
- f) Possession of prohibited substances and methods:
 - Possession by a player in competition of any prohibited method or any prohibited substance, or possession by a player out-of-competition of any prohibited method or any prohibited substance which is prohibited out-of-competition unless the player establishes that the possession is pursuant to a Therapeutic Use Exemption granted in accordance with the procedure defined in the circular referred to in paragraph 4.03 of the present regulations or other acceptable justification.
 - Possession by a player support personnel in-competition of any prohibited method or any prohibited substance, or possession by a player support personnel out-of-competition of any prohibited method or any prohibited substance which is prohibited out-of-competition in connection with a player, competition or training, unless the player support personnel establishes that the possession is pursuant to a Therapeutic Use Exemption granted to a player in accordance with

the procedure defined in the circular referred to in 4.03 of the present regulations or other acceptable justification.

- g) Trafficking or attempted trafficking in any prohibited substance or prohibited method.
- h) Administration or attempted administration to any player in competition of any prohibited method or prohibited substance, or administration or attempted administration to any player out-of-competition of any prohibited method or any prohibited substance that is prohibited out-of-competition, or assisting, encouraging, aiding, abetting, covering up or any other type of complicity involving an anti-doping rule violation or attempted anti-doping rule violation.

Article 3

Burden of proof

- 3.01 UEFA has the burden of establishing whether an anti-doping rule violation has occurred.

Methods of establishing facts and presumptions

- 3.02 Facts related to anti-doping rule violations may be established by any reliable means, including admissions. The following rules of proof are applicable in doping cases:
 - a) WADA-accredited laboratories or as otherwise approved by WADA are presumed to have conducted sample analysis and custodial procedures in accordance with the WADA International Standard for Laboratories. The player or other person may rebut this presumption by establishing that a departure from the International Standard for Laboratories occurred which could reasonably have caused the adverse analytical finding.
 - b) If a player or other person rebuts the aforementioned presumption by showing that a departure from the international standard occurred which could reasonably have caused the adverse analytical finding, then UEFA has the burden of establishing that such departure did not cause the adverse analytical finding.
 - c) Departures from the rules governing the UEFA doping control procedure which do not cause an adverse analytical finding or other anti-doping rule violation do not invalidate such results. If the player or other person establishes that a departure from the rules governing the UEFA doping control procedure, which could reasonably have caused the adverse analytical finding or any anti-doping rule violation occurred, then UEFA has the burden of establishing that the departure did not cause the adverse analytical finding or establishing the factual basis for the anti-doping rule violation.
 - d) The hearing panel in a hearing on an anti-doping rule violation may draw an inference adverse to the player or other person who is asserted to

have committed an anti-doping rule violation based on the player's or other person's refusal, after a request made in a reasonable time in advance of the hearing, to appear at the hearing (either in person or telephonically as directed by the hearing panel) and to answer questions from the hearing panel or UEFA.

Article 4

Prohibited substances and prohibited methods

- 4.01 Prohibited substances and prohibited methods comprise everything on the Prohibited List published by WADA from time to time. The Prohibited List in force is available on WADA's website at www.wada-ama.org. UEFA will notify national associations and clubs participating in UEFA competitions of any amendments to the Prohibited List in due time by circular letter.
- 4.02 WADA's determination of the prohibited substances and prohibited methods that will be included on the Prohibited List and the classification of substances into categories on the Prohibited List is final and shall not be subject to challenge by a player or other person based on an argument that the substance or method was not a masking agent or did not have the potential to enhance performance, represent a health risk or violate the spirit of sport.
- 4.03 For purposes of the application of articles 18 and 19, all prohibited substances shall be considered as specified substances, except substances in the classes of anabolic agents and hormones and those stimulants and hormone antagonists and modulators so identified on the Prohibited List. Prohibited methods shall not be specified substances.

Therapeutic Use Exemption (TUE)

- 4.04 Players with documented medical conditions which require the use of a prohibited substance or method contained in the WADA Prohibited List may be granted a Therapeutic Use Exemption (TUE).
- 4.05 UEFA only considers TUE applications for players of clubs and national associations participating in UEFA competitions. The UEFA administration will issue a circular in due time to notify national associations and clubs participating in UEFA competitions about the specific criteria, conditions and procedure for submitting TUE applications to UEFA. UEFA TUE forms will be enclosed with the circular.
- 4.06 A player may request WADA to review a negative decision by the UEFA TUE Committee within 21 days of receiving such a decision. Such a request does not suspend UEFA's decision. Notification of UEFA's decision may be made by registered letter or by fax.
- 4.07 A player can appeal to CAS against a WADA decision that does not reverse a decision of the UEFA TUE Committee in accordance with the Code.

- 4.08 WADA may review a Therapeutic Use Exemption granted by the UEFA TUE Committee at any time while it is valid. WADA will complete its review within 30 days. If the decision regarding the granting of a TUE is reversed on review, the reversal must not apply retroactively.
- 4.09 UEFA may appeal to CAS against a reversal by WADA of the UEFA TUE Committee decision in accordance with the Code.
- 4.10 Presence of a prohibited substance or its metabolites or markers (subparagraph 2.01a), use or attempted use of a prohibited substance or prohibited method (subparagraph 2.01b), possession of a prohibited substance and prohibited method (subparagraph 2.01f) or administration or attempted administration of a prohibited substance or prohibited method (subparagraph 2.01h) consistent with the provisions of an applicable TUE issued pursuant to the International Standard for TUE shall not be considered an anti-doping rule violation.

II Doping Control Organisation

Article 5

UEFA competencies

- 5.01 The UEFA administration, through its Anti-Doping Unit, deals with the following matters:
- Planning and organisation of in-competition and out-of-competition controls. No advance notice is given of such controls. The unit may order target testing to be conducted.
 - Appointment of Doping Control Officers (DCOs) for doping controls.
 - Providing DCOs with the necessary equipment for their tasks and supporting them in administrative matters.
 - DCO training courses.
 - Selection of a laboratory accredited or otherwise approved by WADA for the analysis of samples. The B sample is analysed by the same laboratory that analysed the A sample.
 - Administration of TUE applications. The Anti-Doping Unit refers the TUE applications to the UEFA TUE Committee.
- 5.02 The UEFA administration through its Anti-Doping Unit deals with the results management and, more specifically, reviews:
- any applicable TUE or Declaration of Use (as defined in the Prohibited List) process;
 - any alleged irregularity of the testing process or laboratory analysis;
 - the explanation of the player tested or other relevant person;
 - atypical findings;
 - possible follow-up investigations;
 - any other anti-doping rule violation.

Article 6

Obligations of national associations, clubs and players

- 6.01 Associations and clubs participating in UEFA competitions undertake to assist UEFA in the implementation of its anti-doping programme described in these regulations. Associations and clubs are responsible for ensuring that any correspondence they receive about anti-doping matters is forwarded to the individual addressee concerned.
- 6.02 Any player participating in a UEFA competition may be required to undergo a doping control after a match and therefore must remain available until 30 minutes after the end of the match. He may also be required to undergo out-of-competition controls and target testing, even if he is under a period of suspension or provisional suspension. Doping controls may include blood and/or urine samples and/or samples of any other biological material.
- 6.03 Every player designated to undergo a doping control is obliged to undergo any medical examination considered necessary by the DCO and to cooperate with the latter in this respect.
- 6.04 Every player is personally responsible for reporting immediately to the doping control station as notified. For out-of-competition testing, the time for reporting is defined in paragraph 8.08.
- 6.05 Every player selected is obliged to provide a sample.
- 6.06 Players from national associations and clubs participating in UEFA competitions must provide whereabouts information at UEFA's request. The ultimate responsibility for providing whereabouts information rests with each player. UEFA will issue a circular in due course to notify national associations and clubs participating in UEFA competitions which players form part of the UEFA out-of-competition testing pool. Teams and/or players in the UEFA out-of-competition testing pool are required to provide up-to-date whereabouts information and, in the case of teams, an up-to-date list of players if requested. Full details of whereabouts information requirements are given in Appendix E: Whereabouts information for out-of-competition testing.
- 6.07 National associations and/or clubs shall obtain whereabouts information concerning teams and/or players if requested by UEFA.
- 6.08 Each national association must assist its national anti-doping organisation in establishing the latter's testing pool of national representative teams and/or players.

Article 7

Draw procedure for in-competition controls

- 7.01 Two players plus two reserves from each team are drawn by lot to undergo a doping control at the doping control station. The Anti-Doping Unit may instruct the DCO on players to be tested.
- 7.02 At all matches where doping controls are to be conducted, the DCO informs the team representatives on his arrival at the match venue. He also explains the procedure for drawing the players to be tested.
- 7.03 The draw is carried out during the half-time interval at a place designated by the DCO, usually in the doping control station.
- 7.04 If for any reason the draw cannot take place at half time, the DCO will contact the team representatives and inform them where and when the open draw will take place. The team representatives must be present. However, should either or both of them not be present on time, the DCO may proceed.
- 7.05 In addition to the DCO and the team representatives, the UEFA match delegate may be present. If the UEFA match delegate is unable to attend, the DCO may appoint a witness.
- 7.06 For the draw, the DCO places numbered counters that correspond to the shirt numbers of all players of each team into two separate receptacles (one envelope or bag per team). The DCO carefully checks that all player numbers of the players listed on the match sheet are included before placing them into the receptacles.
- 7.07 The DCO draws two counters from each receptacle, plus two counters from each receptacle as a reserve. Without looking at them, the DCO places the first four counters drawn into four separate envelopes (one for each player drawn) and the four reserve counters into four separate envelopes marked "reserve" (again, one for each player). The DCO then seals the envelopes, puts these into one big envelope and keeps the rest of the counters in his possession. The DCO then signs the big envelope, which should be countersigned by the team representatives as well as the UEFA match delegate, if present.
- 7.08 The DCO opens the envelopes 15 minutes before the end of the match. At futsal matches, the DCO opens the envelopes after 10 minutes of effective playing time in the second half.

The team representatives must be present when the envelopes are opened. However, should either or both of them not be present on time, the DCO may proceed.
- 7.09 The DCO completes the Doping Control Draw form (D1), the Doping Control Summons form (D2) and the Declaration of Medication form (D3) with the names and numbers of the players drawn and hands over copies to the team representatives, each of whom must then inform the team doctor concerned.

- 7.10 The club or national association concerned is responsible for ensuring that the players drawn to undergo a doping control are taken by the respective team representatives to the doping control station straight from the pitch as soon as the match is over. This applies even when chaperones are appointed by UEFA.
- 7.11 The team doctor or his representative completes the Declaration of Medication (D3) for each player selected to undergo a doping control and personally gives the form signed by the player and the doctor to the DCO. If the player in question has taken or been administered any medication, prohibited substance or prohibited method in the three months preceding the doping control, this must be declared on the form by the team doctor, giving details of the name of the product, the diagnosis, the dosage, when and for how long the product was prescribed, as well as the method and frequency of administration. Any TUE granted to the player must also be declared on the D3 form.
- 7.12 If a selected player sustains a serious injury requiring hospital treatment after the draw or is unable to undergo a doping control for any other compelling reason, the first reserve number will be used and the player with that number will be summoned for the doping control. If this player is also seriously injured or unable to undergo a doping control for any other compelling reason, the second reserve number will be used. Since it is the responsibility of the DCO to judge a player's inability to undergo a doping control, the team doctor must inform the DCO of any such cases.
- 7.13 If a player is shown a red card at any time during the match, the player must remain available to undergo a doping control after the match if he has been drawn or designated in addition to the draw.

Article 8

Draw procedure for out-of-competition controls

- 8.01 The appointed DCO identifies himself to the head or deputy head of delegation of the relevant team and explains the doping control procedure to him, the team doctor and, if applicable, the coach.
- Comment: When mentioning the DCO, the singular is used. However more than one DCO may be appointed by UEFA to conduct out-of-competition controls depending on the number of players to be tested.*
- 8.02 The DCO checks the players present against the list provided by UEFA and reports to UEFA if any players are absent. The reasons for such absences must be provided by the club and are then entered on the players' list by the DCO.
- 8.03 If the players' list has not been registered with UEFA at the time of the control, the head of delegation gives the DCO an up-to-date list of players, including any who are absent. The reasons for such absences must be provided by the club and are then entered on the players' list by the DCO.

- 8.04 The DCO conducts the draw and/or nominates the players to be tested as decided by the Anti-Doping Unit.
- 8.05 Should a draw take place, the DCO conducts it as follows:
- a) Referring to the players' list mentioned in paragraph 8.02 or 8.03, he checks the names and shirt numbers of the players.
 - b) He spreads out on a table the counters containing the numbers of all the players, including the players not present.
 - c) He makes sure that none of the numbers is missing before placing them in an envelope, bag or similar receptacle.
 - d) He then draws as many counters from his envelope, bag or similar receptacle as instructed by the Anti-Doping Unit.
 - e) For each drawn and/or nominated player not present at the time of the draw, the DCO draws a reserve player.
- 8.06 The DCO indicates on the players' list the players drawn and/or nominated for a doping control, the reserve players and any other relevant information, and completes the Doping Control Summons form (D2 OOC) and the Declaration of Medication form (D3) with the names and numbers of the players drawn, including the reserve players. The DCO gives the team doctor a copy of the D2 OOC and D3 forms.
- 8.07 The team doctor or his representative completes the Declaration of Medication (D3) form for each player selected to undergo a doping control and personally gives the form signed by the player and the doctor to the DCO. If the player in question has taken or been administered any medication, prohibited substance or prohibited method in the three months preceding the doping control, this must be declared on the form by the team doctor, giving details of the name of the product, the diagnosis, the dosage, when and for how long the product was prescribed, and the method and frequency of administration. Any TUE granted to the player must also be declared on the D3 form.
- 8.08 The club or national association concerned is responsible for ensuring that the players drawn to undergo a doping control are informed and instructed to report to the doping control station within 60 minutes of being notified or as otherwise instructed by the DCO.
- 8.09 The reserve player will only be tested if the missing player fails to report within 60 minutes of being notified, unless the reserve player offers to provide a sample beforehand. By so doing, the reserve player concerned agrees that his sample will be valid for testing by UEFA even if the missing player reports in time and provides his sample.
- 8.10 Should a player drawn for testing fail to report to the doping control station in time, the DCO will submit a missed test report to UEFA. In such cases, the first reserve player drawn will be used and will be summoned for the doping

control. Should a second player drawn for testing fail to report to the doping control station in time, the second reserve player drawn will be used, and so on.

Article 9

Suspicion of doping

- 9.01 If doping is suspected, the UEFA match delegate and/or the referee and/or the DCO are entitled to summon additional players to be tested.

Article 10

Doping control station

- 10.01 The doping control station must comply with the requirements set out in Appendices A and B of the present regulations.
- 10.02 Apart from the players drawn to undergo a doping control and the team representative and/or chaperone accompanying them, only the following persons will be allowed access to the doping control station:
- a) the DCO;
 - b) the doping control liaison officer of the home team;
 - c) the local doping control officer(s) (if applicable);
 - d) the UEFA match delegate or another UEFA match officer;
 - e) an interpreter approved by the DCO (if necessary).

Anyone else authorised by the DCO to enter the doping control station must record their arrival and departure by signing the Doping Control Station Register form (D4) provided by the DCO.

- 10.03 The players selected remain in the doping control station until they are ready to provide a sample.
- 10.04 Drinks that are free of prohibited doping substances are made available to the players in the form of original, unopened and sealed bottles or cans in a refrigerator in the doping control station. If a player wishes to take his own food and drinks to the doping control station, it is entirely at his own responsibility.
- 10.05 The DCO may order security officers or stewards to ensure that non-authorised persons do not enter the doping control station.

Article 11

Doping control procedure for urine samples

- 11.01 The DCO supervises the doping control procedure. He checks the player's identity by means of the Doping Control Summons form (D2) and asks the player to identify himself. He explains the procedure for the collection of samples and informs the player of his rights and obligations.

- 11.02 The player first selects a clean and previously unused urine collection beaker for the samples.
- 11.03 The player then selects two clean and previously unused transparent glass bottles (one for the A sample and the other the B sample). Each bottle will bear the same code number.
- 11.04 The player urinates into the collection beaker under the strict supervision of the DCO, who must be of the same sex as the player.
- 11.05 The volume of urine must be at least 90ml (A 60ml, B 30ml).
- 11.06 The player decides whether he or the DCO will pour the urine into bottles A and B. If the player decides to do so himself, the DCO explains the procedure to him.
- 11.07 A sufficient volume of urine should be left in the collection beaker to allow the DCO to test the specific gravity (S/G) of the sample. This is then recorded on the Doping Control form (D5). If the requirement for suitable S/G for analysis is not met, the DCO continues to collect additional samples until the requirement for suitable specific gravity for analysis is met. Players who are required to provide additional samples must follow the instructions of the DCO. The DCO may determine that there are exceptional circumstances which mean that, for logistical reasons, it is impossible to continue with the sample collection session. Such exceptional circumstances must be documented accordingly by the DCO.
- 11.08 The player and the DCO check that the bottles are in good and proper condition. The urine sample is poured into bottles A and B and the player or the DCO closes them tightly. The player ensures that no urine can leak out and compares the code numbers on both bottles, the bottle caps and the particulars on the D5 form once again.
- 11.09 The DCO then completes the relevant Doping Control form (D5), which must be signed by the player, the team representative accompanying him and the DCO. On this same form, the player should also clearly indicate the name and address to which he wishes the test result to be sent. If there is no indication or the writing is not legible, the test result will be sent to the club or national association's address. The signatures of the player and the DCO are legally binding. One copy of this form is retained by the DCO, one by the UEFA administration, one by the player, and one by the laboratory. By signing the D5 form, the player confirms that, subject to any concerns recorded by the player in the "Remarks" section, the testing was conducted in accordance with the present regulations and that no subsequent complaint is possible.
- 11.10 The A and B samples of all the players tested and the corresponding copies of the forms are delivered to the laboratory.

Procedure if the stipulated urine volume of 90ml is not obtained

- 11.11 If the urine sample provided is less than 90ml, the player or the DCO pours the volume of urine already collected into the bottle marked A and seals this bottle with the interim sealing device before replacing the cap on the bottle. Next, bottle A is placed back in the polystyrene foam packaging, which also contains bottle B, and sealed with the security tape.
- 11.12 The number of the security tape and the quantity of urine collected (in ml) must be written on the Partial Sample form (D6) provided for this purpose. The player must sign both parts (main part and detachable part) of the D6 form to confirm that the code number is correct on both parts. The name of the player must be written on the main part of the form.
- 11.13 When the player is able to provide an additional sample, he must identify his initial sample by checking the code number on the security tape on the polystyrene foam packaging against the number on the Partial Sample form (D6). The DCO double-checks this as well.
- 11.14 The player and the DCO check together that the security tape has not been broken.
- 11.15 The player then urinates again into a clean, unused beaker.
- 11.16 Under the supervision of the DCO, the player opens the bottle himself by unscrewing the interim sealing device.
- 11.17 The partial sample in the bottle marked A is added to the second sample in the collection beaker to ensure that both samples are properly mixed. If the volume is still insufficient, the steps outlined in paragraphs 11.11 to 11.16 are repeated. Once the required volume is obtained, testing can continue as from paragraph 11.06 to 11.10.

Property of samples

- 11.18 Samples collected under the present regulations become the property of UEFA upon collection.

Article 12

Analysis of samples

- 12.01 Samples must be sent for analysis only to laboratories accredited or otherwise approved by WADA. A list of WADA-accredited laboratories is available on WADA's website at www.wada-ama.org.
- 12.02 Samples are delivered to the UEFA-designated laboratory by the DCO or by courier service. The head of the Anti-Doping Unit or their nominee decides on the appropriate means of transport. The Chain of Custody and Confirmation of Receipt by Laboratory form (D7) must be completed by the DCO and signed by the laboratory.
- 12.03 Samples must be analysed to detect prohibited substances and prohibited methods identified on the WADA Prohibited List and other substances as

may be directed by WADA pursuant to its monitoring programme, or to assist UEFA in profiling relevant parameters in a player's urine, blood or other matrix, including DNA or genomic profiling, for anti-doping purposes.

- 12.04 The laboratory proceeds with the analysis of the A sample and stores the B sample in conformity with the International Standard for Laboratories.
- 12.05 UEFA endeavours to ensure that the analysis of A samples is carried out as soon as possible after arrival at the designated laboratory.
- 12.06 The laboratory communicates all negative test results to the head of the Anti-Doping Unit or his nominee as soon as these results are completed.
- 12.07 If the analysis of the A sample produces a negative result, the B sample is disposed of by the laboratory within the time limit specified in the WADA International Standard for Laboratories, unless the head of the Anti-Doping Unit or his nominee instructs otherwise in writing.
- 12.08 A sample may be reanalysed for the purposes of paragraph 12.02 at any time exclusively at the direction of UEFA or WADA. The circumstances and conditions for retesting samples must conform to the requirements of the International Standard for Laboratories.

Article 13

Procedure if A sample produces an adverse analytical finding

- 13.01 If the A sample produces an adverse analytical finding, the laboratory must inform the head of the Anti-Doping Unit or his nominee immediately and confidentially by telephone. The original full analytical report must be sent to the head of the Anti-Doping Unit or his nominee by recorded delivery and marked "private and confidential".
- 13.02 On receipt of confirmation of an adverse analytical finding with the A sample, the head of the Anti-Doping Unit or his nominee confidentially informs the general secretary of the national association or club concerned or any other qualified representative by telephone in due course. The general secretary of the national association or club concerned or any other qualified representative must immediately inform the player. The head of the Anti-Doping Unit or his nominee then informs the player about the results in writing at the national association's or club's address, unless another address is indicated on the Doping Control form. A copy of the laboratory's findings will be enclosed. The general secretary of the national association or club concerned or any other qualified representative receives a copy of this letter.

Article 14

Right to request a B sample analysis

- 14.01 If the A sample produces an adverse analytical finding, the player is entitled to request an analysis of the B sample within 48 hours of receiving the

registered letter. At UEFA European Championship final tournaments, the 48-hour deadline may be reduced. The participating national associations will be informed by means of a circular letter before the start of the tournament.

- 14.02 Requests for analysis of the B sample must be submitted in writing. If the player does not request analysis of the B sample, he is considered to have fully recognised and accepted the results of the A sample analysis.
- 14.03 If analysis of the B sample is requested, UEFA communicates this request immediately to the head of the laboratory where the B sample is being stored. The B sample analysis takes place at the same laboratory as soon as possible. Both the player and the general secretary of the national association or club concerned are informed of the time at which the B sample is to be opened.
- 14.04 In accordance with the International Standard for Laboratories, the chairman of the Anti-Doping Panel or his appointed representative, as well as the player or his appointed representative, may be present at the laboratory when the bottle containing the B sample is opened and analysed. All costs incurred as a result of the presence of the player or his representative at the laboratory when the B sample is opened and/or analysed must be covered by the player, his club or his national association.
- 14.05 The results of the B sample analysis must be communicated to the head of the Anti-Doping Unit or his nominee immediately and confidentially by telephone. The original analytical report on the B sample must be sent to the head of the Anti-Doping Unit or his nominee by recorded delivery and must be marked "private and confidential".
- 14.06 Unless the head of the Anti-Doping Unit or his nominee requests otherwise in writing, the laboratory must destroy the B sample the day following the minimum period for which the laboratory is required to keep the sample under the International Standard for Laboratories.

Article 15

Procedure if B sample confirms the A sample analysis

- 15.01 If the laboratory report reveals the presence of the same prohibited substance or the use of the same prohibited method in the B sample as was detected in the player's A sample, an anti-doping rule violation will be deemed to have been committed. The same conclusion applies in the event of the player admitting to having committed a doping offence or waiving his right to a B sample analysis.
- 15.02 UEFA is not liable for any consequences of a B sample analysis that does not confirm the adverse analytical finding of the A sample and is therefore declared negative.

Article 16

Doping control procedure for blood samples

- 16.01 The Blood Collection Officer (BCO) draws players in accordance with the procedure set out in Article 7 or 8 of the present regulations according to whether the control is in or out-of-competition. A player may have to provide a urine sample in addition to the blood samples.
- 16.02 If a urine sample is also required, the collection of the blood samples from the player is, in general, carried out first, before the player provides a urine sample.
- 16.03 If a urine sample is also required, part of the doping control station is partitioned off to carry out the blood sampling procedure.
- 16.04 Blood is drawn from the player's vein, preferably from the inner part of the lower arm, while the player is sitting on a chair and resting his arm on a suitable support.
- 16.05 Blood samples are taken by means of a proficient (*lege artis*) intravenous puncture, which entails no health risk, except the possible risk of local haematomas.
- 16.06 The player is allowed to select the required blood sample kit.
- 16.07 At the beginning of the doping control procedure, the BCO explains the blood collection procedure to the selected player with the help of the team doctor.
- 16.08 Medical declarations are required for:
- medication that may affect the venepuncture procedure (particularly those that affect clotting) e.g. aspirin, non-steroidal anti-inflammatory agents;
 - any bleeding disorder which may have an effect on clotting time;
 - any blood transfusions in the last six months (to be declared on the relevant Doping Control form).

Prior to the blood samples being taken, the player is asked if he has understood the procedure and purpose of sampling. If he has taken medication which could affect clotting time, extra care is taken with regard to haemostasis.

- 16.09 The BCO is responsible for:
- hygiene and sterility of the procedure;
 - handling of blood-sampling equipment;
 - handling of blood samples, e.g. mixing anti-coagulants;
 - after-care for the players.

The BCO or his assistant(s) wear(s) sterile gloves during the procedure and only the BCO, his assistant(s) and the players are allowed to handle the samples.

- 16.10 The player decides whether he or the BCO seals the blood samples into the special bottles once the BCO or his assistant(s) has(have) completed the blood-collection procedure. The BCO then places the coded, sealed glass bottles containing the player's blood samples into the transport cool bag.
- 16.11 Blood samples are taken following the usual clinical procedure for blood collection. At least 3ml or 5ml of blood is collected in each of two venepuncture tubes (3ml or 5ml as the A sample; 3ml or 5ml as the B sample). If required, the procedure is repeated and more blood is collected from the same puncture in 3ml or 5ml venepuncture tubes.
- 16.12 If a player's vein collapses after a small amount of blood has been collected, the procedure is repeated on the other arm to obtain a sufficient volume.
- 16.13 Blood tests must be analysed only in WADA-accredited laboratories or as otherwise approved by WADA. Results are communicated in the same way as urine test results.

Property of samples

- 16.14 Samples collected under the present regulations become the property of UEFA upon collection.

III Disciplinary procedure in the event of anti-doping rule violations

Article 17

General provisions

- 17.01 In cases of anti-doping rule violations, UEFA instigates disciplinary proceedings against the parties concerned in accordance with the *UEFA Disciplinary Regulations* and the present regulations. This may include the granting of provisional measures.
- 17.02 Any player penalised for a doping offence may be ordered to undergo further doping controls.
- 17.03 UEFA reserves the right to publicise anti-doping rule violations and their consequences.

Article 18

First violations

- 18.01 Suspension for presence, use, attempted use, or possession of prohibited substances and prohibited methods

The period of suspension imposed for a violation of subparagraph 2.01a (presence of a prohibited substance or its metabolites or markers), subparagraph 2.01b (use or attempted use of a prohibited substance or prohibited method) or subparagraph 2.01f (possession of a prohibited substance and prohibited method) are as follows, unless the conditions for

lifting or reducing the period of suspension, as provided in paragraphs 19.01 and 19.02, or the conditions for increasing the period of suspension, as provided in paragraph 19.03, are met:

First violation: Two years' suspension

18.02 The period of suspension for anti-doping rule violations other than in paragraph 18.01 are as follows:

- a) For violations of subparagraph 2.01c (refusing or failing to submit to a sample collection) or subparagraph 2.01e (tampering or attempted tampering with doping control), the suspension period shall be two years unless the conditions provided in paragraphs 19.02 or 19.03 are met.
- b) For violations of subparagraph 2.01g (trafficking or attempted trafficking) or subparagraph 2.01h (administration or attempted administration of a prohibited substance or prohibited method), the period of suspension imposed shall be a minimum of four years up to a life ban unless the conditions provided in paragraph 19.02 are met. An anti-doping rule violation involving a minor shall be considered a particularly serious violation, and, if committed by player support personnel for violations other than specified substances referenced in paragraph 4.03, results in a life ban. In addition, significant violations of subparagraphs 2.01g and h which also violate state laws and regulations shall be reported to the competent administrative or judicial authorities.
- c) For violations of subparagraph 2.01d (filing failures and/or missed tests), the period of suspension shall be a minimum of one year and a maximum of two years based on the player's degree of fault.

Article 19

Increasing, reducing or lifting suspensions

19.01 Lifting or reducing the period of suspension for specified substances under specific circumstances

Where a player or other person can establish how a specified substance entered his body or came into his possession and that this specified substance was not intended to enhance the player's performance or mask the use of a performance-enhancing substance, the period of suspension found in paragraph 18.01 shall be replaced with the following:

First violation: At a minimum, a reprimand and no period of suspension from future events, and at a maximum, two years' suspension.

To justify any lifting or reduction of a suspension, the player or other person must produce corroborating evidence in addition to his word which establishes to the comfortable satisfaction of the hearing panel the absence of an intent to enhance sport performance or mask the use of a performance-enhancing substance. The player or other person's degree of fault shall be

the criterion considered in assessing any reduction of the period of suspension.

19.02 Lifting or reducing the period of suspension based on exceptional circumstances:

a) No fault or negligence

If a player establishes in an individual case that he bears no fault or negligence, the otherwise applicable period of suspension is lifted. When a prohibited substance or its markers or metabolites is detected in a player's sample in violation of subparagraph 2.01a (presence of prohibited substance or its metabolites or markers), the player must also establish how the prohibited substance entered his system in order to have the suspension lifted. If this subparagraph is applied and the otherwise applicable suspension is lifted, the anti-doping rule violation shall not be considered a violation for the limited purpose of determining the period of suspension for multiple violations under paragraph 20.02.

b) No significant fault or negligence

If a player or other person establishes in an individual case that he bears no significant fault or negligence, then the otherwise applicable period of suspension may be reduced, but the reduced period of suspension may not be less than half of the period of suspension otherwise applicable. If the otherwise applicable suspension is a life ban, the reduced period under this article may be no less than eight years. When a prohibited substance or its markers or metabolites is detected in a player's sample in violation of subparagraph 2.01a (presence of a prohibited substance or its metabolites or markers), the player must also establish how the prohibited substance entered his system in order to have the period of suspension reduced.

c) Substantial assistance in discovering or establishing anti-doping rule violations

UEFA may, prior to a final appellate decision or the expiration of the time to appeal, suspend a part of the period of suspension imposed in an individual case where the player or other person has provided substantial assistance to an anti-doping organisation, criminal authority or professional disciplinary body which results in the anti-doping organisation discovering or establishing an anti-doping rule violation by another person or which results in a criminal or disciplinary body discovering or establishing a criminal offence or the breach of professional rules by another person. After a final appellate decision or the expiration of time to appeal, UEFA may only suspend a part of the otherwise applicable period of suspension with the approval of WADA and FIFA. The extent to which the otherwise applicable period of suspension may be suspended shall be based on the seriousness of the anti-doping rule violation committed by the player or other person and the

significance of the substantial assistance provided by the player or other person to the effort to eliminate doping in sport. No more than three-quarters of the otherwise applicable period of suspension may be suspended. If the otherwise applicable period of suspension is a lifetime, the non-suspended period under this section must be no less than eight years. If UEFA suspends any part of the otherwise applicable period of suspension under this article, UEFA shall promptly provide a written justification of its decision to each anti-doping organisation having a right to appeal the decision. If UEFA subsequently reinstates any part of the suspension because the player or other person fails to provide the substantial assistance anticipated, the player or other person may appeal the reinstatement.

- d) Admission of an anti-doping rule violation in the absence of other evidence

Where a player or other person voluntarily admits the commission of an anti-doping rule violation before having received notice of a sample collection which could establish an anti-doping rule violation (or, in the case of an anti-doping rule violation other than subparagraph 2.01a, before receiving first notice of the admitted violation) and if that admission is the only reliable evidence of the violation at the time of admission, then the period of suspension may be reduced, but not to below half of the period of suspension otherwise applicable.

- e) Where a player or other person establishes entitlement to reduction in sanction under more than one provision of this article

Before any applying reductions under subparagraphs 19.02b to d, the otherwise applicable period of suspension shall be determined in accordance with paragraphs 18.01, 18.02, 19.01 and 19.03. If the player or other person establishes entitlement to a reduction or suspension of the period of suspension under two or more of subparagraphs 19.02b to d, then the period of suspension may be reduced or suspended, but not to below one-quarter of the otherwise applicable period of suspension.

19.03 Aggravating circumstances which may increase the period of suspension

If UEFA establishes in an individual case involving an anti-doping rule violation other than those under subparagraphs 2.01g (trafficking or attempted trafficking) and 2.01h (administration or attempted administration) that aggravating circumstances are present which justify a period of suspension greater than the standard sanction, then the period of suspension otherwise applicable shall be increased up to a maximum of four years unless the player or other person can prove to the comfortable satisfaction of the hearing panel that he did not knowingly violate the anti-doping rule.

A player or other person can avoid the application of this paragraph by admitting the alleged anti-doping rule violation promptly after being confronted with the anti-doping rule violation by UEFA.

Article 20

Multiple violations

20.01 For the purposes of paragraph 20.02, each anti-doping rule violation must take place within the same eight-year period in order for them to be considered multiple violations.

20.02 Second anti-doping rule violation

For a player's or other person's first anti-doping rule violation, the period of suspension is set forth in paragraphs 18.01 and 18.02 (subject to lifting, reduction or suspension under paragraphs 19.01 or 19.02, or to an increase under paragraph 19.03). For a second anti-doping rule violation, the period of suspension shall be within the range set forth in the table below.

2nd violation	RS	FFMT	NSF	St	AS	TRA
1st violation						
RS	1-4	2-4	2-4	4-4	8-10	10-life
FFMT	1-4	4-8	4-8	6-8	10-life	life
NSF	1-4	4-8	4-8	6-8	10-life	life
St	2-4	6-8	6-8	8-life	life	life
AS	4-5	10-life	10-life	life	life	life
TRA	8-life	life	life	life	life	life

Key:

RS (Reduced sanction for specified substance under paragraph 19.01): The anti-doping rule violation was or should be penalised by a reduced sanction under paragraph 19.01 because it involved a specified substance and the other conditions under paragraph 19.01 were met.

FFMT (Filing failures and/or missed tests): The anti-doping rule violation was or should be penalised under subparagraph 18.02c (filing failures and/or missed tests).

NSF (Reduced sanction for no significant fault or negligence): The anti-doping rule violation was or should be penalised by a reduced sanction under subparagraph 19.02b because the player proved that there was no significant fault or negligence on his part under subparagraph 19.02b.

St (Standard sanction under paragraph 18.01 or subparagraph 18.02a): The anti-doping rule violation was or should be penalised by the standard sanction of two years under paragraph 18.01 or subparagraph 18.02a.

AS (Aggravated sanction): The anti-doping rule violation was or should be penalised by an increased sanction under paragraph 19.03 because UEFA established the conditions set forth under paragraph 19.03.

TRA (Trafficking or attempted trafficking and administration or attempted administration): The anti-doping rule violation was or should be penalised under subparagraph 18.02b for trafficking or administration.

20.03 Application of subparagraphs 19.02c and d to second anti-doping rule violations

Where a player or other person who commits a second anti-doping rule violation establishes entitlement to suspension or reduction of a portion of the period of suspension under subparagraph 19.02c or d, the hearing panel first determines the otherwise applicable period of suspension within the range established in the table in paragraph 20.02 and then applies the appropriate suspension or reduction of the period of suspension. The remaining period of suspension, after applying any suspension or reduction under subparagraphs 19.02c and d, must be at least one-quarter of the otherwise applicable period of suspension.

20.04 Third anti-doping rule violation

A third anti-doping rule violation always results in a life ban unless the third violation fulfils the condition for lifting or reducing the period of suspension under paragraph 19.01 or involves a violation of subparagraph 2.01d (filing failures and/or missed tests). In these particular cases, the suspension shall be from eight years to life ban.

20.05 Additional rules on potential multiple violations

- a) For the purposes of imposing sanctions under paragraph 20.02, an anti-doping rule violation will only be considered a second violation if UEFA can establish that the player or other person committed the second anti-doping rule violation after the player or other person received notice, or after UEFA made reasonable efforts to give notice, of the first anti-doping rule violation. If UEFA cannot establish this, the violations shall be considered together as a single, first violation and the sanction imposed is based on the violation that carries the more severe sanction. However, the occurrence of multiple violations may be considered as a factor in determining aggravating circumstances (paragraph 19.03).
- b) If, after the resolution of a first anti-doping rule violation, UEFA discovers facts involving an anti-doping rule violation by the player or other person which occurred prior to notification regarding the first violation, UEFA shall impose an additional sanction based on the sanction that could have been imposed if the two violations had been adjudicated at the same

time. To avoid the possibility of aggravating circumstances (paragraph 19.03) on account of the earlier-in-time but later-discovered violation, the player or other person must voluntarily and promptly admit the earlier anti-doping rule violation after notice of the violation for which he is first charged. The same rule shall also apply if UEFA discovers facts involving another prior violation after the resolution of a second anti-doping rule violation.

Article 21

Team consequences

21.01 Testing of team

Where more than one player of the same team is notified of a possible anti-doping rule violation in conformity with the present regulations, UEFA administration conducts appropriate target testing of the team during the competition period.

21.02 Consequences for team

If more than two players from the same team are found to have committed an anti-doping rule violation in relation to a prohibited (non-specified) substance or method, the team in question may be disqualified from the competition in progress and/or future competitions in accordance with the *UEFA Disciplinary Regulations*.

IV Further provisions

Article 22

Court of Arbitration for Sport

22.01 In case of litigation resulting from or in relation to these regulations, the provisions regarding the Court of Arbitration for Sport (CAS) laid down in the UEFA Statutes apply.

Article 23

Closing provisions

23.01 In the present regulations, the masculine form refers to both sexes.

23.02 Any matter not provided for in these regulations will be settled by the general secretary in consultation with the Anti-Doping Panel. All such decisions are final.

23.03 The UEFA administration in consultation with the Anti-Doping Panel is entitled to take the decisions and adopt the detailed provisions necessary for the implementation of these regulations.

23.04 If there is any discrepancy in the interpretation of the English, French or German versions of these regulations, the English version prevails.

23.05 The present regulations apply to any anti-doping rule violation committed after they have come into force.

23.06 The present regulations come into force on 7 June 2010.

For the UEFA Executive Committee:

Michel Platini
President

Gianni Infantino
General Secretary

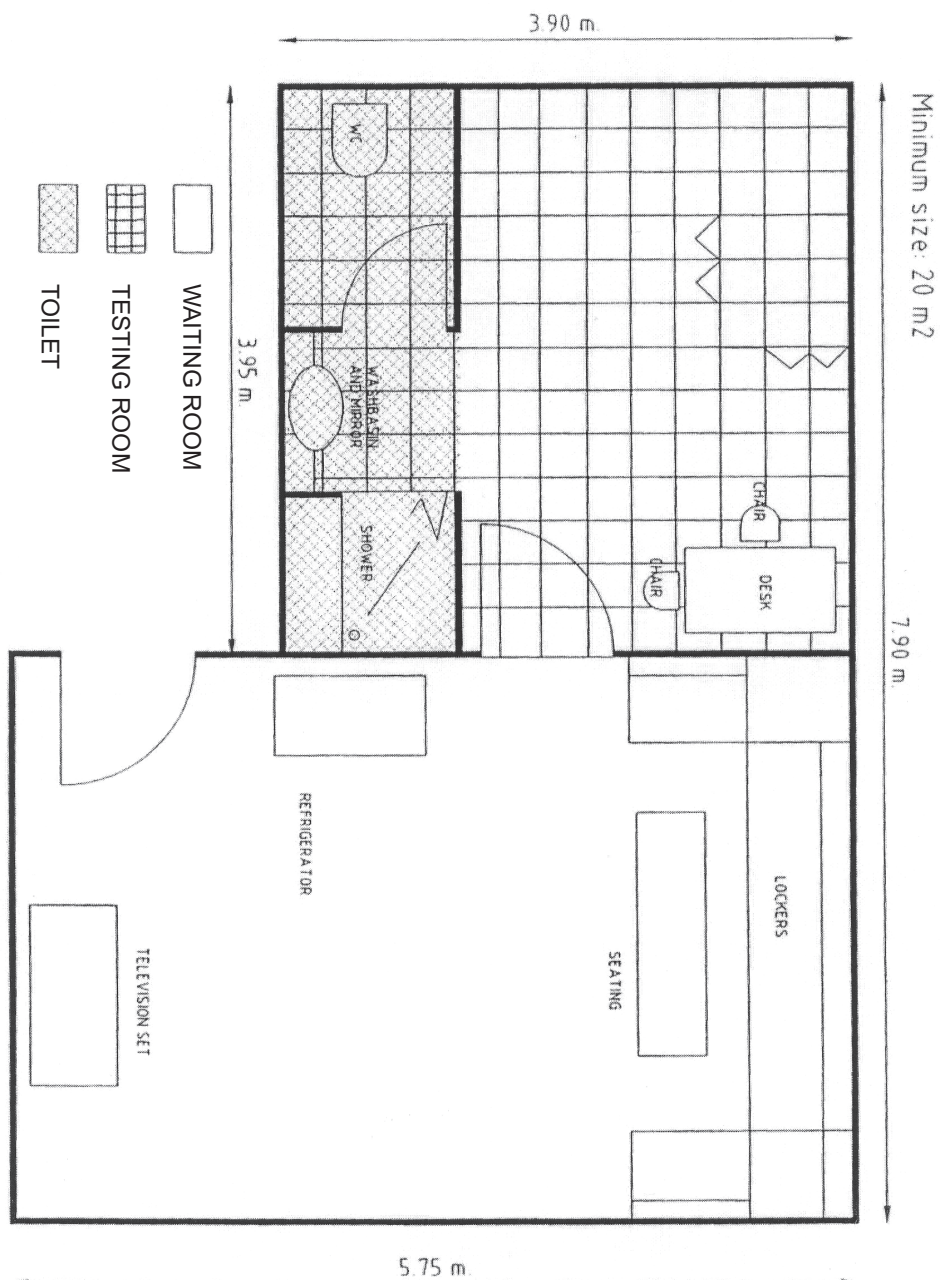

Nyon, 23 March 2010

APPENDIX A: Instructions to organisers of UEFA matches

1. For each match, the home team appoints a Doping Control Liaison Officer whose duty is to remain at the disposal of the DCO. This Doping Control Liaison Officer does not need to be medically trained. He should, however, be able to speak English and must remain available until the doping control has been completed. His main task is to ensure that the doping control station and all necessary materials and equipment are available and ready for the purposes of the doping control, as described in the present Appendix and in Appendix B. He must also organise transport for the DCO back to his hotel on completion of the doping control.
2. The home team must provide a room for doping control purposes (doping control station). It must be near the players' dressing rooms and inaccessible to the public and the media. It must be at least 20m² and comprise a waiting room, a testing room and a toilet, all adjoining. The doping control station must exceed 20m² for some competitions, but the teams concerned will be notified accordingly and in due time.
 - a) The testing room must contain:
 - table (1)
 - chairs (4)
 - sink with running water
 - toiletries (soap, towels, etc.)
 - cabinet with a lock
 - toilet (adjacent to the room or in the room itself).
 - b) The toilet area should be within the testing room, or immediately next to it and with direct private access to the testing room, and must contain:
 - WC with seat
 - sink with running water
 - shower (if possible).
 - c) The waiting room forms part of or is immediately adjacent to the testing room (a partition dividing the two areas is also acceptable) and must contain:
 - sufficient seating for eight
 - clothes-hanging facilities or lockers for four (if possible)
 - refrigerator
 - television set (if possible).
3. An assortment of drinks, free of prohibited doping substances, in their original, unopened and sealed bottles or cans must be provided in a refrigerator in the waiting room of the doping control station (approx. 10 litres of still mineral water, 12 cans of caffeine-free soft drinks and approx. 12 cans of non-alcoholic beer).

4. A top-category seat must be reserved for the DCO in the directors' box or equivalent. This seat should be located near the seat reserved for the UEFA match delegate and must provide easy access to the doping station.
5. Stewards at the main stadium gates must be informed that persons who identify themselves as DCOs and who show special UEFA passes with their photograph are to be granted free access to the stadium.
6. The DCO may order security officers or stewards to ensure that non-authorised persons do not enter the doping control station.

APPENDIX B: Plan of Doping Control Station

APPENDIX C: Definitions

Adverse analytical finding: A report from a laboratory or other WADA-approved entity that, consistent with the International Standard for Laboratories and related technical documents, identifies in a sample the presence of a prohibited substance or its metabolites or markers (including elevated quantities of endogenous substances) or evidence of the use of a prohibited method.

Anti-doping organisation: An organisation that is responsible for adopting rules for initiating, implementing or enforcing any part of the doping control procedure. This includes, for example, FIFA and the national anti-doping organisation, which may be either the national Olympic committee or another designated body.

Attempt: Purposely engaging in conduct that constitutes a substantial step in a course of conduct planned to culminate in the commission of an anti-doping rule violation. However no anti-doping rule violation may be based solely on an attempt to commit a violation if the person renounces the attempt prior to it being discovered by a third party not involved in the attempt.

Atypical finding: A report from a laboratory or other WADA-approved entity which requires further investigation under the International Standard for Laboratories or related technical documents prior to the determination of an adverse analytical finding.

Blood Collection Officer (BCO): A DCO who is qualified to collect a blood sample from the player and who is responsible for blood sampling. He may not delegate the sampling procedure to his assistant(s) unless they are qualified phlebotomists.

CAS: Court of Arbitration for Sport.

Chaperone: A person appointed by UEFA who notifies the player assigned to him from among those selected for a doping control and accompanies the player from the time he is notified until the doping control is completed. If UEFA does not appoint a chaperone, the team has to appoint a representative to notify the players of his team and accompany them to the doping control station.

Code: The World Anti-Doping Code, issued by WADA.

Doping control: All steps and processes from test distribution planning, through to any lodging of appeal, including all steps and processes in between such as provision of whereabouts information, sample collection and handling, laboratory analysis, Therapeutic Use Exemptions, results management and hearings.

Doping Control Liaison Officer: A person appointed by the home team who is at the disposal of the DCO. A description of his tasks is included in Appendix A, paragraph 1.

Doping Control Officer (DCO): A physician (male or female) who is appointed by the UEFA administration to conduct a doping control. The DCO is responsible for the entire doping control procedure, including the draw, the collection of samples and the transport of samples to the WADA-accredited laboratory. The DCO has the authority to take decisions on the site of the doping control within the framework of these regulations. The DCO may be assisted by a Doping Control Officer Assistant or a chaperone.

Doping Control Officer Assistant: A person appointed by the UEFA administration who assists the DCO in his work from the time of the latter's arrival at the stadium until completion of the doping control. His main tasks are to register all persons entering the doping control station on the Doping Control Station Register form (D4) and to supervise the working area of the doping control station. He can also be requested to act as a chaperone, i.e. to notify the player(s) assigned to him from among those selected for a doping control and accompany these player(s) from the time they are notified until the doping control is completed.

Filing failure: A failure by the player (or by a third party to whom this task was delegated) to make an accurate and complete whereabouts filing in accordance with paragraphs 4 to 7 of Appendix E.

In competition: This phase starts 24 hours before a single match or the first match of a tournament and terminates 24 hours after the single match or the end of the tournament.

International standard or WADA international standard: A standard adopted by WADA in support of the Code. Compliance with an international standard (as opposed to another alternative standard, practice or procedure) is sufficient to conclude that the procedures were performed properly. An international standard includes any technical documents issued pursuant to the international standard.

Marker: A compound, group of compounds or biological parameter(s) that indicates the use of a prohibited substance or prohibited method.

Match: An individual game played within the context of a competition, excluding tournaments.

Metabolite: Any substance produced by a biotransformation process.

Minor: A natural person who has not reached the age of majority as established by the applicable laws of his country of residence.

No advance notice doping control: A doping control which takes place with no advance warning to the player.

No fault or negligence: If the player establishes that he did not know or suspect, and could not reasonably have known or suspected, even with the exercise of utmost

caution, that he had used or been administered a prohibited substance or prohibited method.

No significant fault or negligence: If the player establishes that his fault or negligence, when viewed in the totality of the circumstances and taking into account the no fault or negligence criteria, was not significant in relation to the anti-doping rule violation.

Out-of-competition: Any time which is outside the in competition phase.

Person: A natural person or a juristic person.

Player: For the purposes of doping controls, any person who participates in a UEFA competition as a player.

Player support personnel: Any coach, trainer, manager, agent, team staff, official, medical, paramedical personnel, parent or any other person working with, treating or assisting players participating in or preparing for sports competition.

Possession: The actual, physical possession, or the constructive possession (which is found only if the person has exclusive control over the prohibited substance or prohibited method or the premises in which a prohibited substance or prohibited method exists). If the person does not have exclusive control over the prohibited substance or prohibited method or the premises in which a prohibited substance or prohibited method exists, constructive possession is found only if the person knew about the presence of the prohibited substance or prohibited method and intended to exercise control over it. No anti-doping rule violation is based solely on possession if, prior to receiving notification of any kind that the person has committed an anti-doping rule violation, he has taken concrete action demonstrating that the person never intended to possess and has renounced possession by explicitly declaring it to an anti-doping organisation. Notwithstanding anything to the contrary in this definition, the purchase (including by any electronic or other means) of a prohibited substance or prohibited method constitutes possession by the person who makes the purchase.

Prohibited List: The WADA list identifying prohibited substances and prohibited methods.

Prohibited Method: Any method so described on the Prohibited List.

Prohibited Substance: Any substance so described on the Prohibited List.

Sample: Any biological material collected for the purposes of a doping control.

Substantial assistance: For the purposes of subparagraph 19.02c, a person providing substantial assistance must: (i) fully disclose in a signed written statement all information he possesses in relation to anti-doping rule violations, and (ii) fully cooperate with the investigation and adjudication of any case related to that information, including, for example, presenting testimony at a hearing if requested to

do so by an anti-doping organisation or hearing panel. Further, the information provided must be credible and must comprise an important part of any case which is initiated or, if no case is initiated, must have provided a sufficient basis on which a case could have been brought.

Suitable specific gravity: Specific gravity measured at 1.005 or higher with a refractometer, or 1.010 or higher with test strips.

Tampering: Altering for an improper purpose or in an improper way; bringing improper influence to bear; interfering improperly; obstructing, misleading or engaging in any fraudulent conduct to alter results or prevent normal procedures from occurring; or providing fraudulent information to an anti-doping organisation.

Target testing: Selection of players for testing where specific players or groups of players are selected on a non-random basis for testing at a specified time.

Team: All players participating in a match, for a club or a national team.

Team representative: A person appointed by his team as its representative at the half-time draw, at the opening of the envelopes and when the players from his team are tested.

Therapeutic Use Exemption Committee (TUE Committee): This UEFA body is composed on a case by case basis to grant, review and cancel TUEs.

Tournament: A competition involving several (national or club) teams over a defined period of time (e.g. EURO 2008, from the opening match until the final).

Trafficking: Selling, giving, transporting, sending, delivering or distributing a prohibited substance or prohibited method (either physically or by any electronic or other means) by a player, player support personnel or any other person subject to the jurisdiction of an anti-doping organisation to any third party. This does not include the actions of bona fide medical personnel involving a prohibited substance used for genuine and legal therapeutic purposes or with other acceptable justification, nor does it include actions involving prohibited substances which are not prohibited in out-of-competition testing unless the circumstances as a whole demonstrate that the prohibited substances are not intended for genuine and legal therapeutic purposes.

Use: The utilisation, application, ingestion, injection or consumption by any means whatsoever of any prohibited substance or prohibited method.

WADA: The World Anti-Doping Agency.

Whereabouts failure: A filing failure or missed test.

Whereabouts filing/whereabouts information: Information regarding date, time and place (full address) of training sessions, matches and any other activities of a team or player.

You have been selected to undergo a doping control and are requested to come immediately after the end of the match, to the doping control station.

You may be accompanied by the doctor, coach or any other team official.

Refusal to undergo a doping control or attempts to manipulate it shall have the same consequences as adverse analytical finding.

Vous avez été désigné pour subir un contrôle antidopage et vous êtes prié de vous présenter immédiatement après la fin du match dans le local de contrôle antidopage.

Vous pouvez vous faire accompagner par le médecin, l'entraîneur ou le responsable de votre équipe.

Refuser de se présenter à un contrôle antidopage ou essayer de le manipuler aurait les mêmes conséquences qu'en cas de résultat d'analyse anormale.

Sie wurden für einen Dopingtest ausgewählt und werden gebeten, sich unmittelbar nach Spielschluss in der Dopingkontrollstation einzufinden.

Sie können sich von Ihrem Arzt, Trainer oder Betreuer begleiten lassen.

Die Verweigerung einer Dopingkontrolle oder der Versuch einer Manipulation haben die gleichen Konsequenzen wie ein positiver Befund.

You have been selected to undergo an out-of-competition doping control and are requested to come within 60 minutes of notification to the doping control station.

You may be accompanied by the doctor, coach or any other team official.

Refusal to undergo a doping control or attempts to manipulate it shall have the same consequences as adverse analytical finding.

Vous avez été désigné pour subir un contrôle antidopage hors compétition et vous êtes prié de vous présenter au plus tard 60 minutes après avoir été notifié dans le local de contrôle antidopage.

Vous pouvez vous faire accompagner par le médecin, l'entraîneur ou le responsable de votre équipe.

Refuser de se présenter à un contrôle antidopage ou essayer de le manipuler aurait les mêmes conséquences qu'en cas d'analyse anormale.

Sie wurden für einen Dopingtest ausserhalb von Wettbewerben ausgewählt und werden gebeten, sich innerhalb von 60 Minuten nach Erhalt der Mitteilung in der Dopingkontrollstation einzufinden.

Sie können sich von Ihrem Arzt, Trainer oder Betreuer begleiten lassen.

Die Verweigerung einer Dopingkontrolle oder der Versuch einer Manipulation haben die gleichen Konsequenzen wie ein positiver Befund.

certifie que le joueur mentionné ci-après
a pris ou a reçu les médicaments ou
le traitement suivants:

bescheinigt, dass der unten aufgeführte Spieler
die folgenden Medikamente eingenommen hat
bzw. dass diese ihm verabreicht wurden oder
dass er die folgende Behandlung bekommen hat:

☐ The player has a TUE (Therapeutic Use Exemption)
Le joueur est au bénéfice d'une AUT (Autorisation d'usage à des fins thérapeutiques)
Der Spieler hat eine MAG (Medizinische Ausnahmegenehmigung)

To what anti-doping organisation was the TUE request sent?
A quelle organisation antidopage la demande d'AUT a-t-elle été envoyée?
An welche Antidoping-Organisation wurde der MAG-Antrag geschickt?

When was the TUE request sent (date)?
Quand cette demande d'AUT a-t-elle été envoyée (date)?
Wann wurde der MAG-Antrag abgeschickt (Datum)?

When did the player receive a TUE certificate (date)?
Quand le joueur a-t-il reçu un certificat d'une AUT (date)?
Wann hat der Spieler ein MAG-Zertifikat erhalten (Datum)?

What prohibited substance(s)?
Quelle(s) substance(s) interdite(s)?
Beantragte Substanz(en)?

1. All other substances used are declared hereunder including local use of glucocorticosteroids.
Toute autre substance est déclarée ci-dessous y compris les glucocorticoïdes à usage local.
Alle anderen verwendeten Substanzen, einschliesslich Glukokortikosteroide für die lokale Anwendung, sind nachstehend deklariert:

Player number Joueur n° Spieler Nr.	Surname Nom Name		First name Prénom Vorname	
Diagnosis Diagnostic Diagnose	Name of medication Nom du médicament Name des Medikaments	Substance Substance Substanz	Dosage Dosage Dosierung	Frequency of administration Fréquence d'administration Häufigkeit der Verabreichung

2. Caution: for glucocorticosteroids any administration in the last three months must be declared. Failure to declare may result in disciplinary action in the event of an adverse analytical finding (positive result).
Attention: toute administration de glucocorticoïdes au cours des trois derniers mois doit être déclarée, sous peine d'action disciplinaire en cas de résultat d'analyse anormal (positif).
Vorsicht: Bei Glukokortikosteroiden jede Verabreichung innerhalb der letzten drei Monate angeben. Eine Nichtangabe kann im Falle eines positiven Befunds disziplinarische Massnahmen nach sich ziehen.

3. I hereby confirm that I have taken/been administered the medication listed above and no other local use of glucocorticosteroids.
Je confirme par la présente que j'ai pris ou que le médecin d'équipe m'a administré les médicaments ci-dessus et aucun autre glucocorticoïde, même à usage local.
Ich bestätige hiermit, dass ich vor dem Spiel die oben aufgeführten Medikamente eingenommen habe oder sie mir verabreicht wurden und dass keine andere lokale Anwendung von Glukokortikosteroiden erfolgt ist.

Urine Test / Contrôle d'urine / Urinkontrolle

In our presence and under our strict control,
the player gave a urine sample at
___ hours ___ minutes.

En notre présence et sous notre contrôle,
le joueur a fourni un échantillon d'urine à
___ heures ___ minutes.

In unserer Gegenwart und unter unserer strikten
Kontrolle hat der Spieler um ___ Uhr ___ Minuten
eine Urinprobe abgegeben.

S/G

Suitable S/G value reached ?

☐ Yes ☐ No

Exigences en matière de gravité spécifique remplies?

☐ Oui ☐ Non

Benötigtes spezifisches Gewicht (S/G) erreicht?

☐ Ja ☐ Nein

The urine sample has been decanted into two
separate bottles labelled "A" and "B", bearing the
code numbers below. These bottles have been
sealed for transport in accordance with the
regulations.

L'échantillon d'urine a été versé dans deux
flacons «A» et «B» portant les codes
ci-dessous. Ces flacons ont été scellés
pour le transport, conformément au règlement.

Die Urinprobe wurde in zwei kodierte (siehe unten)
Flaschen mit der Beschriftung «A» und «B» gefüllt.
Diese Flaschen wurden dem Règlement entsprechend
für den Transport versiegelt.

UEFA	A
-------------	----------

- ☐ The player refused to give a urine sample
- ☐ The player poured the urine into bottles "A" and "B" himself
- ☐ The player asked and authorized the Doping Control Officer to pour the urine into bottles "A" and "B"

- ☐ Le joueur a refusé de fournir un échantillon d'urine.
- ☐ Le joueur a versé lui-même l'urine dans les flacons A et B
- ☐ Le joueur a demandé au contrôleur antidopage de verser l'urine dans les flacons A et B et lui en a donné l'autorisation

- ☐ Der Spieler hat die Abgabe einer Urinprobe verweigert.
- ☐ Der Spieler hat den Urin selbst in die Flaschen A und B gefüllt
- ☐ Der Spieler hat den Dopingkontrollierer gebeten und ermächtigt, den Urin in die Flaschen A und B zu füllen

The whole procedure took place in the presence
of the UEFA Doping Control Officer and the
official accompanying the player.

L'ensemble de la procédure s'est déroulée en
présence du contrôleur antidopage de l'UEFA
et de l'officiel accompagnant le joueur.

Alle Vorgänge wurden in Anwesenheit des
UEFA-Dopingkontrollierers und des offiziellen
Begleiters des Spielers durchgeführt.

Resolution of disputes

I agree that any dispute not resolved after exhaustion
of the legal remedies established by UEFA shall be
submitted exclusively to the Court of Arbitration for
Sport (CAS) for final and binding arbitration. I take note
that I must submit such a dispute to the CAS within
10 days of the notification of the decision, which is
challenged. I also take note that proceedings before
CAS shall take place in accordance with the Code of
Sports-related Arbitration of CAS.
The CAS shall rule on its jurisdiction and has the
exclusive power to order provisional and conservatory
measures. The decisions of CAS shall be final.

Règlement des litiges

J'accepte que tout litige non résolu après épuisement
des voies de droits établies par l'UEFA sera soumis
exclusivement au Tribunal Arbitral du Sport (T.A.S.) et
tranché de manière définitive et obligatoire. Je prends
note que je dois soumettre un tel litige dans un délai
de 10 jours après notification de la décision contestée.
Je prends également note que la procédure suit les
dispositions du Code de l'arbitrage en matière de sport
du T.A.S.
Le T.A.S. statue sur sa compétence et a le pouvoir
exclusif d'ordonner des mesures provisionnelles et
conservatoires. Les décisions du T.A.S. sont
définitives.

Streitigkeiten

Ich akzeptiere, dass alle Streitigkeiten im Zusammenhang
mit Dopingangelegenheiten nach Ausschöpfung der von
der UEFA vorgesehenen Rechtsmittel ausschließlich und
endgültig durch das Schiedsgericht des Sports «TAS»
entschieden werden. Ich nehme davon Kenntnis, dass
eine allfällige Klage innert 10 Tagen nach Eröffnung des
anzufechtenden Entscheides beim «TAS» einzureichen
ist. Ich nehme ebenfalls davon Kenntnis, dass sich das
Verfahren nach der Schiedsordnung für Streitigkeiten im
Bereich des Sports des «TAS» richtet.
Das «TAS» beurteilt seine Zuständigkeit selber und kann
vorläufige oder sichernde Massnahmen anordnen. Der
Schiedsspruch des «TAS» ist endgültig.

Remarks
Remarques
Bemerkungen

I certify that, subject to my above comments in the
"Remarks" section, the testing was collected in
accordance with UEFA regulations and procedures
and that no subsequent complaint is possible

Je certifie que, sous réserve des commentaires
ci-dessus figurant dans la rubrique «Remarques»,
le prélèvement s'est déroulé en conformité avec le
règlement et les procédures de l'UEFA et que toute
plainte ultérieure est exclue.

Ich bestätige, dass die Probe unter Vorbehalt meiner
Kommentare in der Rubrik „Bemerkungen“ in Über-
einstimmung mit dem Règlement und den Verfahren
der UEFA entnommen wurde und dass keine nach-
träglichen Beschwerden möglich sind.

Teilprobe

I, the undersigned player, confirm that the quantity of urine indicated below provided by me has been poured into the 'A' bottle. This bottle has been sealed with the interim sealing device before replacing the cap on the bottle. The 'A' bottle has been placed back in the polystyrene foam packaging, which also contains bottle 'B', and sealed with the security tape.

Le joueur soussigné confirme que le volume d'urine ci-dessous qu'il a fourni a été versé dans le flacon «A». Ce flacon a été scellé au moyen du mécanisme de scellage provisoire avant de remplacer le bouchon. Le flacon «A» a été replacé dans l'emballage en polystyrène, qui contient également le flacon «B», et scellé avec la bande adhésive de sécurité.

Der unterzeichnende Spieler bestätigt, dass die folgende von ihm abgegebene Urinmenge in die Flasche «A» abgefüllt wurde. Diese Flasche wurde mit dem Zwischenversiegelungszapfen versiegelt und der Deckel auf die Flasche gestülpt. Die Flasche «A» wurde darauf in die Styroporschachtel gelegt, die auch die Flasche «B» enthält, und mit dem Sicherheitsklebeband verschlossen.

APPENDIX E: Whereabouts information for out-of-competition testing

Testing pool

1. The UEFA Anti-Doping Panel shall identify a UEFA out-of-competition registered testing pool of those teams and/or players which/who are required to provide up-to-date whereabouts information to UEFA.
2. The Anti-Doping Panel shall define the criteria for teams and/or players to be included in the registered testing pool and may also include players individually. The Anti-Doping Panel may revise the registered testing pool from time to time as appropriate.
3. Teams and/or players will remain in the registered testing pool and continue to be required to provide up-to-date whereabouts information to UEFA until they have been informed by the Anti-Doping Panel that they have been removed from the registered testing pool.

Players who are under a period of suspension will remain in the registered testing pool and continue to be required to provide whereabouts information.

Players who are transferred to another team or have given notice of retirement from football to their team may be required to provide whereabouts information and must remain available for unannounced out-of-competition testing during a period of six months.

Comment: Notice of retirement is effective only when the player has returned his licence to his national association for that purpose.

Whereabouts information requirements

4. The Anti-Doping Panel shall notify teams and/or players in the registered testing pool in writing that they have been included in the pool and that they must provide accurate whereabouts information in accordance with the present appendix and with any further instructions that the Anti-Doping Panel may deem appropriate.

The notification shall set the deadline for the submission of whereabouts information by the teams and/or players.

When a team is part of the registered testing pool, it shall be responsible for collecting and forwarding to the Anti-Doping Panel the whereabouts information of all its players registered to participate in the UEFA competition.

However, the ultimate responsibility for providing whereabouts information rests with each player and he must be sure to keep his team informed when he is not participating or involved in team activities.

5. All teams and/or players in the registered testing pool shall send reports to the Anti-Doping Panel on forms provided by UEFA which specify on a daily basis the locations where the teams and/or players will be residing and the times when they will be training and competing.
6. Should a team and/or player's plans change from those originally submitted on the whereabouts information forms, the team and/or player shall immediately send updates of all information required on the form so that it is current at all times.
7. The team and/or player shall send whereabouts information and updates by fax to the Anti-Doping Panel using the confidential number +41 22 990 31 31. The team and/or player may also provide whereabouts information and updates by electronic means to anti-doping@uefa.ch.

Failure to comply

8. For each attempt to locate the team and/or player for testing, the Doping Control Officer will visit all locations during the times specified by the team and/or player for that date and will stay one hour at each location (or until the scheduled departure time from that location previously specified by the team and/or player, if earlier).
9. Should the team fail to be located for testing on the basis of the most up-to-date whereabouts information it has supplied, fail to provide complete, adequate or accurate whereabouts information, or fail to provide whereabouts information on time, the Anti-Doping Panel will notify without delay the team in writing of the failure. The Anti-Doping Panel sets a deadline for submission of any justification by the team.

Any such failure committed by the team without sufficient reason will be reported to the Control & Disciplinary Body without delay.

10. Should a player fail to be located for testing on the basis of the most up-to-date information received from the team and/or player, the Anti-Doping Panel will notify without delay the team and player in writing of any such failure. The Anti-Doping Panel will set a deadline for submission of any justification by the team.
11. A total of three instances of whereabouts failure (failure to provide accurate whereabouts information and/or a missed test) in a rolling period of 18 months constitutes an anti-doping rule violation by the player concerned under subparagraph 2.01d of the present regulations.

The player will be notified in writing of each whereabouts failure.

12. A team and/or player's whereabouts failure in accordance with the present appendix may be combined with whereabouts failures recorded by other anti-doping organisations, provided (i) the anti-doping organisation had authority under the Code, (ii) the Anti-Doping Panel was informed in time and (iii) the

facts recorded by the anti-doping organisation constitute, to the satisfaction of the Anti-Doping Panel, whereabouts failure in accordance with the present appendix.

Coordination with other anti-doping organisations

13. UEFA may also collect whereabouts information from the national associations, WADA and other anti-doping organisations.
14. UEFA may make the list of teams and/or players in the registered testing pool available to WADA and other anti-doping organisations.
15. UEFA may submit all whereabouts information to WADA, which may make such information accessible to other anti-doping organisations having authority to test the team and/or player as defined in the Code.
16. UEFA may supply whereabouts information to other anti-doping organisations having authority to test the team and/or player as defined in the Code.

Confidentiality

17. UEFA shall maintain whereabouts information in strict confidence at all times and shall use it exclusively for the purposes of planning, coordinating or conducting tests. UEFA shall destroy whereabouts information when it is no longer relevant for these purposes.
18. Under the Code, WADA and all anti-doping organisations that have accepted the Code are bound by the same obligations concerning the confidentiality of whereabouts information.

However, UEFA shall not be liable for any use that WADA or any anti-doping organisation makes of whereabouts information, even if the information was provided by UEFA. Teams and/or players shall have no claim against UEFA in this respect.
