--------	----	---	---	-------	----	---	---	-------	----	---	---	-------	-------	----	--

**Coefficient of the 2005/06 season**      **Legend:** Pts. = Points; B = Bonus; M = Matches; G = Goal difference

\* Directly qualified as final round host

**Qualifying Round(s):**

- All qualifying round matches have been taken into consideration for all seasons.
- Teams eliminated in the qualifying round = results of the qualifying round have been taken into consideration.
- Participating teams in the Elite round = results of the qualifying & Elite rounds have been taken into consideration.
- Seeded teams = results of the Elite round have been taken into consideration.

Match points; Victory = 3 points; Draw = 1 point; Defeat = 0 point

**Bonus points:**

- Qualification to Elite round (incl. seeded teams) = 3 points
- Qualification to the final round = 3 points
- European Champions = 3 additional bonus points i.e. Spain (2006/07 & 2007/08); Germany (2008/09)

The coefficient for each season has been calculated by taking the number of points obtained (including bonus points) and dividing it. The three annual coefficients have then been added together to produce the overall coefficient used for the ranking list.

Associations with the same overall coefficient have been separated according to the following criteria:

- 1) Higher number of matches
- 2) Higher coefficient for the 2008/09 season
- 3) Higher coefficient for the 2007/08 season
- 4) Higher coefficient for the 2006/07 season
- 5) Superior goal difference for the 2008/09 season
