Coefficient of the 2007/08 season **Legend:** Pts. = Points; B = Bonus; M = Matches; G = Goal difference

* Directly qualified as final round host

Qualifying Round(s):

- All qualifying round matches have been taken into consideration for all seasons.
- Teams eliminated in the qualifying round = results of the qualifying round have been taken into consideration.
- Participating teams in the elite round = results of the qualifying & elite rounds have been taken into consideration.

Match points; Victory = 3 points; Draw = 1 point; Defeat = 0 point

Bonus points:

- Qualification to elite round = 3 points
- Qualification to the final round = 3 points
- European Champions = 3 additional bonus points i.e. Germany (2008/09); England (2009/10); Netherlands (2010/11)
- European runners-up = 2 additional bonus points i.e. Netherlands (2008/09); Spain (2009/10); Germany (2010/11)
- European semi-finalists = 1 additional bonus point i.e. Switzerland & Italy (2008/09); France & Turkey (2009/10); England & Denmark (2010/11)

The coefficient calculation for each season consists in adding the number of points obtained (including bonus points) and dividing the total by the number of matches.

The three annual coefficient calculations have then been added together to produce the overall coefficient used for the ranking list.

Associations with the same overall coefficient have been separated according to the following criteria:

- 1) Higher number of matches
- 2) Higher coefficient for the 2010/11 season
- 3) Higher coefficient for the 2009/10 season
- 4) Higher coefficient for the 2008/09 season
- 5) Superior goal difference for the 2010/11 season
