Legend: Pts. = Points; B = Bonus; M = Matches; G = Goal difference

In red: including bonus points for winner & runners-up

Qualifying Round(s):

- All qualifying round matches have been taken into consideration for all seasons.
- Teams eliminated in the preliminary round = results of the preliminary round have been taken into consideration.
- Participating teams in the intermediate round = results of the preliminary & intermediate rounds have been taken into consideration.
- Match points; Victory = 3 points; Draw = 1 point; Defeat = 0 points

Bonus points:

- Direct qualification to intermediate round = 3 points
- Qualification to the final round = 3 points
- European Champions = 3 additional bonus points i.e. Portugal (2010/11); Italy (2012/13); Rep. Ireland (2014/15)
- European runners-up = 2 additional bonus points i.e. Rep. Ireland (2010/11); Spain (2012/13); Croatia (2014/15)
- Qualification from preliminary round to intermediate round = 3 points

The coefficient for each season has been calculated by taking the number of points obtained (including bonus points) and dividing it by the number of matches. The three annual coefficients have then been added together to produce the overall coefficient used for the ranking list.

Associations with the same overall coefficient have been separated according to the following criteria:

- 1) Higher number of matches
- 2) Higher coefficient for the 2014/15 season
- 3) Higher coefficient for the 2012/13 season
- 4) Higher coefficient for the 2010/11 season
- 5) Superior goal difference for the 2014/15 season
